MVD personnel lived within the confines of the colony. Regular MVD troops, most of whom were from the Uzbek, SSR, were housed in barracks outside the compound. The general layout of YA 38/10 is enclosed as page 3. The buildings were one-story and decrepit-looking. An unspecified number of elevated guard posts in line of sight of each other surrounded the compound. The front gate had two sets of electrically-operated, metal doors. Any entering or exiting vehicle was searched before the second set of doors was opened.
